DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because "attachable" in line 1 should read --Attachable--. Correction is required. See MPEP § 608.01(b).

Claim Objections

2. Claim 1 is objected to because of the following informalities: in line 1, --a-- should be inserted before "person's". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant claims a method of attaching a sitting device around a person's waist or lower back however no method steps are recited; only a list of closure means is recited.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3726

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Somers'391 (US Patent 6,345,391) or Somers'959 (US Patent 6,175,959) or Carmack et al. (US Patent 5,275,315) or Malmstrom (US Patent 4,923,247) or Pekala (US Patent 4,025,105) or Bayley GB 2 267 208).

Somers'391, Somers'959, Carmack et al., Malmstrom, Pekala or Bayley all substantially disclose a method of attaching a seating device around a person's waist or lower back as claimed by Applicant, see the listed documents. Although there is no disclosure of retractable strings coiled in a plastic container secured at each corner of the seating device to help attach the seating device, however it is within the general knowledge of one of ordinary skill in the art to provide appropriate fastening means to the seating device. Therefore it would have been obvious to one of ordinary skill in the art to provide appropriate fastening means to the seating device, as is within the general knowledge of one of ordinary skill in the art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
